

LAB - 9. Program.

```

class ThreadDemo extends Thread {
    public void mainrun () {
        for (int i=0; i<1000; i++)
            try {
                System.out.println("BMS");
                Thread.sleep(10000);
            }
            catch (Exception e) {
                System.out.println(e);
            }
    }
}

```

college of
Engineering

```

class ThreadDemo1 extends Thread {
    public void mainrun () {
        for (int i=0; i<1000; i++) {
            try {
                System.out.println("CSB");
                Thread.sleep(2000);
            }
            catch (Exception e) {
                System.out.println(e);
            }
        }
    }
}

```

```
class App {
```

```
    public static void main (String[] args) {
```

```
        ThreadDemo t1 = new ThreadDemo();
```

```
        ThreadDemo t2 = new ThreadDemo();
```

```
        t1.start();
```

```
        t2.start();
```

```
    }
```
